Personalisation

FC print with doming

A logo leaves the best impression when printed in full colour. Thanks to our digital printing technique we can print a logo in any colour, without charging extra. It is even possible to print photos. Each print is covered with a scratchproof acrylic layer (doming). This doming makes the print stand out even more and keeps it perfectly visible even when used frequently.

Full colour print

With digital printing the artwork is printed directly onto the product. We photo-realistic print every logo or image. With this technique, the preliminary phase is shorter and the production process can start sooner.

Laser engraving

Laser engraving is a stylish way of adding a logo or text to a product. With engraving the artwork is marked into the product using a laser. A computer accurately controls the position and movement of the laser to engrave the desired artwork into the product.

DeoChrome®

DeoChrome® is a unique engraving technique which will give a metallic look to the engraving. The result is a beautiful reflective logo, website or any other personalisation.

Single sided

The product can be personalised on one side only. The type of personalisation depends on the product.

Double sided

The product can be personalised on both sides. The type of personalisation depends on the product.

Multi sided

The product can be personalised on various positions. The type of personalisation depends on the product.

USB London

Housing:	Plastic
Size:	85 x 85 mm
Print surface:	According to design
Capacity:	128MB - 2GB - 4GB - 8GB - 16GB - 32GB - 64GB
